

PARSHVA PANCHAL

7710073189 Mumbai, Maharashtra

parshav687@gmail.com [linkedin.com/in/parshvap1](https://www.linkedin.com/in/parshvap1) github.com/parshva7

EDUCATION

Dwarkadas J. Sanghvi College of Engineering, Mumbai

Aug 2023 - Present

B.Tech in Artificial Intelligence & Data Science, **CGPA: 8.48**

EXPERIENCE

AI Engineer

Jun 2026 – Present

Godrej Enterprises Group (Interio Business)

Mumbai

- Engineered a computer vision system for inspection of chair seats, automating **100%** manual inspection process.
- Built a **multi-view image pipeline** for real time defect detection, preventing defective units from reaching **load testing**.

TECHNICAL SKILLS

Languages: C++, Python, SQL

Tools & Technologies: Git, Tableau, REST APIs, Web Scraping

Frameworks & Databases: React, Node.js, Express, MySQL, Supabase, MongoDB

Computer Vision & Libraries: Object Detection, Image Processing, YOLO, PIL, NumPy, Pandas, OpenCV

Core Competencies: Machine Learning, Large Language Models (LLMs)

PROJECTS

Vision-Based Chair Seat Inspection System | *Python, OpenCV, Image Processing, PIL* | [GitHub](#) *Jul 2026*

- Automated chair-seat inspection using computer vision, reducing inspection time by up to **80%**.
- Deployed on Raspberry Pi with 90° actuator rotation, push-button control, and operator dashboard for PASS/FAIL results.
- Integrated QR-code printing for chair-wise staple counts, improving traceability and quality control.

Data Analytics IPL Performance Visualization | *Tableau, SQL* | [GitHub](#) *Feb 2026*

- Built an interactive dashboard for the visualization of the performance of players and teams in IPL seasons.
- Designing of dynamic dashboards with calculated metrics, filters and player comparison features.
- 17 IPL seasons analyzed, over 1,000 matches, **15+** performance KPIs.

Online Learning Platform | *JavaScript, React, Node.js, Razorpay, Supabase* | [GitHub](#) *Nov 2025*

- Full-stack platform capable of accommodating up to **100+** users, for efficient course management, enrollment and monitoring of student's progress.
- Role based authentication, subscription management, video handling and payments for students.
- All transactions are secure with role-based access control, to secure systems, resulting in **100%** reduction in unauthorized access.

Malicious URL Detection System | *Python, Machine Learning, Flask API, React* | [GitHub](#) *Oct 2025*

- Machine learning system on phishing and malicious URL detection with **10** engineered URL features and ability to predict in real-time.
- Constructed URL predictors, evaluated several classification algorithms and introduced SHAP explainability techniques.
- Achieved **83%** accuracy exceeding baseline accuracy 77.3% and 69.8%

ACHIEVEMENTS

- Second Runner-up** at **AUTOMAX 2026**, Automation Exhibition that was carried out internally by the Godrej Enterprises Group (Interio Business).
