

# PARSHVA PANCHAL

7710073189 Mumbai, Maharashtra

[parshav687@gmail.com](mailto:parshav687@gmail.com) [linkedin.com/in/parshvap1](https://www.linkedin.com/in/parshvap1) [github.com/parshva7](https://github.com/parshva7)

## EDUCATION

**Dwarkadas J. Sanghvi College of Engineering, Mumbai**

*Aug 2023 - Present*

B.Tech in Artificial Intelligence & Data Science, **CGPA: 8.48**

## EXPERIENCE

**AI Engineer**

*Jun 2026 – Present*

**Godrej Enterprises Group (Interio Business)**

*Mumbai*

- Engineered a computer vision system for inspection of chair seats, automating **100%** manual inspection process.
- Built a **multi-view image pipeline** for real time defect detection, preventing defective units from reaching **load testing**.

## TECHNICAL SKILLS

**Languages:** C++, Python, SQL

**Tools & Technologies:** Git, Tableau, REST APIs

**Frameworks & Databases:** React, Node.js, Express, MySQL, Supabase, MongoDB

**Computer Vision:** OpenCV, Object Detection, Image Processing, YOLO, PIL

**Core Competencies:** Machine Learning, Large Language Models (LLMs)

## PROJECTS

**Vision-Based Chair Seat Inspection System** | *Python, OpenCV, Image Processing, PIL* | [GitHub](#) *Jul 2026*

- Vision system that checks chair seats in seconds instead of minutes, cutting inspection time by over **80%**.
- Automated staple counting and edge detection, delivering instant PASS/FAIL output with zero human intervention.
- Improved reliability of inspections by identifying defects that were often missed during manual inspection.

**Data Analytics IPL Performance Visualization** | *Tableau, SQL* | [GitHub](#) *Feb 2026*

- Built an interactive dashboard for the visualization of performance of players and teams in IPL seasons.
- Designing of dynamic dashboards with calculated metrics, filters and player comparison features.
- 17 IPL seasons analyzed, over 1,000 matches, **15+** performance KPIs.

**Online Learning Platform** | *JavaScript, React, Node.js, Razorpay, Supabase* | [GitHub](#) *Nov 2025*

- Full-stack platform capable of accommodating up to **100+** users, for efficient course management, enrollment and monitoring of student's progress.
- Role based authentication, subscription management, videos handling and payments for students.
- All transactions are secure with role-based access control, to secured systems, resulting in **100%** reduction in unauthorized access.

**Malicious URL Detection System** | *Python, Machine Learning, Flask API, React* | [GitHub](#) *Oct 2025*

- Machine learning system on phishing and malicious URLs detection with **10** engineered URL features and ability to predict in real-time.
- Constructed URL predictors, evaluated several classification algorithms and introduced SHAP explainability techniques.
- Achieved **83%** accuracy exceeding baseline accuracy 77.3% and 69.8%

## ACHIEVEMENTS

- Second Runner-up** at **AUTOMAX 2026**, Automation Exhibition that was carried out internally by the Godrej Enterprises Group (Interio Business).
