

PARSHVA PANCHAL

7710073189 Mumbai, Maharashtra

parshav687@gmail.com [linkedin.com/in/parshvap1](https://www.linkedin.com/in/parshvap1) github.com/parshva7

EDUCATION

Dwarkadas J. Sanghvi College of Engineering, Mumbai
B.Tech in Artificial Intelligence & Data Science, **CGPA: 8.48**

Aug 2023 - Present

EXPERIENCE

AI Engineer
Godrej Enterprises Group (Interio Business)

Jun 2026 – Present
Mumbai

- Engineered a computer vision system for inspection of chair seats, automating **100%** manual inspection process.
- Created a **multi-view image pipeline** for real time defect detection, preventing defective units from reaching **load testing**.

TECHNICAL SKILLS

Languages: C++, Python, SQL

Tools: Git, Tableau, REST APIs, Web Scraping

Frameworks & Databases: React, Node.js, Express, MySQL, Supabase, MongoDB

AI/ML: Machine Learning, LLMs, Scikit-learn, Transformers, NumPy, Pandas, Matplotlib, Seaborn

Computer Vision: Object Detection, Image Processing, YOLO, OpenCV, PIL

PROJECTS

Procura AI | *Python, Machine Learning, Transformers, OCR* | [GitHub](#)

Sept 2026

- Developing an AI-based procurement system to automate the entire workflow from request processing to quotation generation.
- Implemented an ETA prediction model using XGBoost and Feature Transformer with **21.9%** exact predictions using Transformer and **17.1%** using XGBoost.
- Lowered safety buffer under-predictions to **19.0%** using Transformer and **22.6%** using XGBoost on synthetic procurement data.

Vision-Based Chair Seat Inspection System | *Python, OpenCV, Image Processing, PIL* | [GitHub](#) *Jul 2026*

- Automated chair-seat inspection using computer vision, reducing inspection time by up to **80%**.
- Deployed on Raspberry Pi with 90° actuator rotation, push-button control, and operator dashboard for PASS/FAIL results.
- Integrated QR-code printing for chair-wise staple counts, improving traceability and quality control.

Data Analytics IPL Performance Visualization | *Tableau, SQL* | [GitHub](#)

Feb 2026

- Created a dashboard to display performance of players and teams throughout IPL seasons.
- Calculated metrics were used for analysis of players and teams statistics, filters, and player comparison.
- Studied 17 IPL seasons comprising 1,000+ games and **15+** performance KPIs.

Malicious URL Detection System | *Python, scikit-learn, Flask API, React* | [GitHub](#)

Oct 2025

- Built a scikit-learn classification pipeline for phishing/malicious URL detection using **10** engineered features with real-time prediction.
- Evaluated multiple classification algorithms and applied **SHAP** for model explainability.
- Achieved **83%** accuracy, exceeding baseline accuracies of 77.3% and 69.8%.

ACHIEVEMENTS

- Second Runner-up** at **AUTOMAX 2026**, Automation Exhibition that was carried out internally by the Godrej Enterprises Group (Interio Business).
